

Rutherford Building Refurbishment Project

Phase 3, summer 2010

Library 1st floor refurbishment:

- new furniture throughout
- more desks where students can use (and plug in) laptops
- improved wireless coverage
- "zoning" of the reading room to provide clear guidance on activities permitted by the use of colour coordinated furniture
- toilets redecorated on 1st and 2nd floors

Air conditioning

The air conditioning system in the library is being replaced.

Disruption

We will try to keep disruption to a minimum. The old furniture in the 1st floor reading room will be taken out from 16 August, electrical works and new furniture delivery will happen in early September. We will need to close parts of the 1st floor reading room at times. The 2nd floor and IT will be as normal.

Comments

Any comments, questions or feedback would be welcomed. Please contact the project team via library@gold.ac.uk and we will be pleased to discuss any queries that you may have.

We hope these changes make the library a better, more comfortable place to study, by the start of next term.
