Programme overview

This three-year undergraduate programme addresses the theories, policies and practices of International Relations from a critical perspective. The discipline of international relations emerged in its current form in the Cold War era; but as the realities of the world order have dramatically changed, the discipline is also in the process of changing. The emphasis in this degree is on an international relations for the 21st century: one characterised by multipolarity rather than a bipolar world; by the growing importance of Asia and Africa and Latin America, rather than the dominance of Europe and the US; and one in which the key actors are not only states, but also transnational networks, movements, NGOs, corporations and diasporas. It uncovers the complex interactions between policy makers, institutions and non- state actors that shape global issues such as human rights, conflict, development, migration and climate change. Throughout, there is an emphasis on culture -on the ways in

which politics is shaped by the different modes of living and understanding 'the international'. The programme embraces a historical and comparative approach that allows for recognition of the plural economic and cultural origins of the global system, and it foregrounds ideas and experiences from the Global South that are increasingly shaping the 21st century.

The programme will develop students theoretical and applied knowledge through diverse forms of learning and assessment. They will have the opportunity to gain practical experience in a work placement with international NGOs and policy think-tanks. The programme will prepare them for working in international roles and contexts, including for international organisations, media or governments.

This degree programme will comprise a combination of core and non-core optional modules, adding up to 360 credits over a three year degree. Core modules will cover the essential elements of the IR discipline, such as: IR theory; global governance; security studies; and the politics of the Global South. Students will also have a wide range of options to choose from, including specialist modules on Middle East politics; US politics and foreign policy; international political economy; conflict and peacebuilding in Africa; the political cultures of China, Japan, Latin America; nationalism and international intervention.

This new programme will replace the existing BA International Studies which has been discontinued from 2017-18 due to low recruitment. It differs significantly from this programme in offering new modules and a more distinct IR pathway, but also builds on the strengths of the previous programme.

Furthermore, BA IR will sit alongside the existing BA Politics and International Relations Programme (in its first year). But it will be distinct from it in the sense that PIR is a combined studies programme in which there is a roughly 50/50 split in emphasis on politics and international relations with a more flexible structure and a greater degree of module choices; whereas, BA IR is more streamlined and more heavily weighted towards IR (with a minimum of 50% in first year and 75% in the third year). Students also have a more rigorous structure with more compulsory modules. Moreover BA IR offers students an IR Work Placement optional module which is designed to prepare students for careers in international contexts and organisations. However, because BA PIR and BA IR share the same entry requirements and modules at level 4, students may transfer from one programme to the other, either at the start of yr1 or the start of yr 2 (level 5).

Academic support

Additional academic support is carried out through the department's personal and senior tutoring system. In summary, personal tutoring in the department aims to enable students to achieve successful learning outcomes by supporting their academic progression and helping them navigate their individual learning journey from induction to graduation. All students are assigned a personal tutor during their period of study at Goldsmiths. Personal tutors will be expected to meet students at least once a term to discuss academic progression. They will be able to advise them on academic progression and on other matters, including personal development, employability and career planning.

Personal tutors are supported in their roles by a system of Senior Tutors. Amongst other things, Senior Tutors are responsible for considering and implementing any student and staff Personal Tutor change requests.

Students are provided with information about learning resources, the [Library](#) and information available on [Learn.gold \(VLE\)](#) so that they have access to department/ programme handbooks, programme information and support related information and guidance.

Taught sessions and lectures provide overviews of themes, which students are encouraged to complement with intensive reading for presentation and discussion with peers at seminars. Assessments build on lectures and seminars so students are expected to attend

all taught sessions to build knowledge and their own understanding of their chosen discipline.

All assessed work is accompanied by some form of feedback to ensure that students' work is on the right track. It may come in a variety of forms ranging from written comments on a marked essay to oral and written feedback on developing projects and practice as they attend workshops.

Students may be referred to specialist student services by department staff or they may access support services independently. Information about support services is provided on the [Goldsmiths website](#) and for new students through new starter information and induction/Welcome Week. Any support recommendations that are made are agreed with the student and communicated to the department so that adjustments to learning and teaching are able to be implemented at a department level and students can be reassured that arrangements are in place. Opportunities are provided for students to review their support arrangements should their circumstances change. The [Disability](#) and [Wellbeing](#) Services maintain caseloads of students and provide on-going support.

The [Careers Service](#) provides central support for skills enhancement, running [The Gold Award](#) scheme and other co-curricular activities that are accredited via the Higher Education Achievement Report ([HEAR](#)).

The [Centre for Academic Language and Literacies](#) works with academic departments offering bespoke academic literacy sessions. It also provides a programme of academic skills workshops and one-to-one provision for students throughout the year.

Placement opportunities

The Department offers an optional, final-year work placement module (15 credits). Students are offered dedicated support by the module convenor and Goldsmiths Careers Service in Autumn term to secure a work experience placement in weeks 2-9 of Spring term for up to 16 days (2 days per week). Sessions are offered on employment and job search training, including CV and covering letter workshops.

Students are placed with appropriate host organisations and offered support throughout their placement. Placement providers will include a range of organisations in the NGO sector such as charities, think-tanks and pressure groups, bodies connected with international organisations, appropriate businesses, and political parties. Recent placement providers have included: Members of Parliament; media such as We Are the News; charities such as Lawyers Against Poverty, the 999 Club and JAN Trust; NGOs and think

tanks such as Amnesty International and Compass; and businesses such as ING Bank and ESG Mark Investment Analytics.

The work placement offers students the chance to apply previously-gained, theory-derived knowledge to a practical project within the host organisation. In doing so they critically evaluate and apply their experiences acquired to inform and enhance their own knowledge, offer alternative approaches and propose novel solutions to specific academic issues. They are able to evaluate their own skills, values and personal traits and create a strategy for development of further skills and career preparation.

Employability and potential career opportunities

Students graduating from the IR programme are likely to move into a range of career options and employment areas, including working for international organisations and NGOs, the civil service or in diplomacy, journalism and teaching, and international business and consultancy.
