Programme overview

The BA (Hons) Sociology and Politics programme equips students with the practical tools to understand the world around them, but also to think about how to change it for the better. The degree gives students a thorough grounding in both sociology and politics, in methods of social and political research, and in interdisciplinary approaches. The degree aims to offer a challenging and flexible programme of study that stimulates independent thinking and curiosity in a wide range of sociology and politics. By bringing together the concerns, theories and methodologies of both sociology and politics, students develop rich, analytical and informed engagement with contemporary problems. Students study local and global events to explore diverse issues in Sociology, such as: how social inequalities operate and how they might be overcome; how social movements can combat oppression; how concepts of citizenship and human rights are contested; how historical processes such as colonialism continue to shape today's societies; and how the climate crisis requires us to develop new ways of thinking and acting. In Politics, students won't just learn about politics in terms of

what happens in the Houses of Parliament and conventional arenas of power in the West, but also what happens on the streets, in art galleries, and in the Global South.

Studying at Goldsmiths means joining one of the world's leading sociology departments. We are ranked: joint 1st in the UK for research intensity in sociology (Complete University Guide Subject League Tables 2021); 13 in terms of research excellence (REF 2022 GPA score), and in the top 40 in the world by the QS World University Subject Rankings 2021.

A core part of the programme is that our staff teach their own specialisms: they're pioneers in their fields and write the books that are on reading lists across the country. Students tailor their own journeys throughout their degrees by choosing from a wide range of option modules from their first year of study, including work placements. Our focus is on helping undergraduate students to become the type of sociologist and political scientist they want to be. Students 'get messy' with hands-on research methods modules - Methods of Worldmaking' - in their first two years, which form the spine of the programme, before designing and carrying out their own dissertation projects in their final year.

Diversified assessments support students to consolidate their learning, and students develop transferrable skills such as research design, data analysis, critical thinking, project management, working with others, and tackling inequalities knowledgeably and ethically; this means they experience what it means to be a sociologist and political scientist from day one.

Programme entry requirements

The programme is particularly suitable for applicants who will enjoy the academic inter-relationship between two disciplines and the creative rigour of theoretical and practical studies in sociology and politics. Please refer to the Undergraduate Prospectus for qualification requirements.

A-level: BBB

BTEC: DDM

IB: 33 Points, HL655

Access: 60 credits overall with 30 distinctions and distinctions/merits in related subject.

We do not assume that you have prior knowledge of Sociology or Politics, and students with arts, social studies, humanities or science backgrounds are equally eligible for admission. Normally, you will be expected to have A level grades of BBB for admission. If you have any AS Levels that have not been continued to A Level or Advanced Higher, these will also be taken into account. These are a guide and we can admit applicants without A- levels if they have other evidence of ability – for example, successfully having completed an Access or Certificate module in a related area. We welcome mature students (aged over 21) with 'nontraditional' educational backgrounds.

Grading Criteria

Mark	Descriptor	Specific Marking Criteria
80-100%	1st: First (Exceptional)	Represents the overall achievement of the appropriate learning outcomes to an exceptionally accomplished level. A grade of 80-100% is awarded when candidates show outstanding and highly advanced application and understanding of theoretical or methodological areas, an original, critical and sophisticated approach.
70-79%	1st: First (Excellent)	Represents the overall achievement of the appropriate learning outcomes to an excellent level. A grade of 70-79% is awarded when candidates show an advanced or sophisticated understanding and application of theoretical or methodological areas in critical, original and independent ways in relation to the module learning outcomes.
60-69%	2.1: Upper Second (Very good)	Represents the overall achievement of the appropriate learning outcomes to a good level. A grade of 60-69% is awarded when candidates show consistency and fluency in discussing and evaluating appropriate reading from a range of sources (or bringing a range of reading to bear on analysis of, for example, texts). They will demonstrate an ability to relate this reading clearly to the examination/coursework topic and to structure their own essay. They will clearly have

		understood, assimilated and responded to the relevant literature. The written submission will demonstrate the effective application of appropriate knowledge, understandings and skills specified in the module learning outcomes.
50-59%	2.2: Lower Second (Good)	Represents the overall achievement of the appropriate learning outcomes to a threshold level. A grade of 50-59% is awarded when there is evidence of knowledge and understanding, but where there is limited development of ideas and critical comment. The written submission will demonstrate an overall satisfactory application of knowledge, understandings and skills specified in the module learning outcomes. There will be reference to relevant reading, though not necessarily critical evaluation. Within these limitations there will be some indication that the candidate has grasped fundamental concepts in the field and the point of the question.
40-49%	3rd: Third (Pass)	Represents the overall achievement of the appropriate learning outcomes to a threshold level. A grade of 40-49% is awarded when a candidate provides some evidence that they have read recommended texts but shows that their understanding is limited or contradictory, and organisation of the essay is inadequate. The written work will demonstrate that the majority of the appropriate module learning outcomes are achieved to a satisfactory level. However, the point of the question is not fully grasped or knowledge for responding to the question is lacking. There is no critical evaluation of reading.
25-39%	Fail	Represents an overall failure to achieve the appropriate learning outcomes. A grade of 25-39% is awarded when the majority of the module learning outcomes are not achieved. There is some recognition of the question but no clarity and no evidence of sufficient knowledge or understanding to respond to it.
10-24%	Bad fail	Represents a significant overall failure to achieve the appropriate learning outcomes.
1-9%	Very bad fail	A submission that does not even attempt to address the specified learning outcomes (shall be deemed a non-valid attempt and module must be re-sat).
0%	Non submission or plagiarised	A categorical mark representing either the failure to submit an assessment or a mark assigned for a plagiarised assessment

Academic support

Support for learning and wellbeing is provided in a number of ways by departments and College support services who work collaboratively to ensure students get the right help to reach their best potential both academically and personally.

All students are allocated a Personal Tutor (one in each department for joint programmes) who has overall responsibility for their individual progress and welfare. Personal Tutors meet with their student at least three a year either face-to-face, as part of a group and/or electronically. The first meeting normally takes place within the first few weeks of the autumn term. Personal Tutors are also available to students throughout the year of study. These meetings aim to discuss progress on modules, discussion of the academic discipline and reports from previous years if available (for continuing students). This provides an opportunity for progress, attendance and assessment marks to be reviewed and an informed discussion to take place about how to strengthen individual learning and success.

All students are also allocated a Senior Tutor to enable them to speak to an experienced academic member of staff about any issues which are negatively impacting their academic study and which are beyond the normal scope of issues handled by Programme Convenors and Personal Tutors.

Students are provided with information about learning resources, the [Library](#) and information available on [Learn.gold \(VLE\)](#) so that they have access to department/ programme handbooks, programme information and support related information and guidance.

Taught sessions and lectures provide overviews of themes, which students are encouraged to complement with intensive reading for presentation and discussion with peers at seminars. Assessments build on lectures and seminars so students are expected to attend all taught sessions to build knowledge and their own understanding of their chosen discipline.

All assessed work is accompanied by some form of feedback to ensure that students' work is on the right track. It may come in a variety of forms ranging from written comments on a marked essay to oral and written feedback on developing projects and practice as they attend workshops.

Students may be referred to specialist student services by department staff or they may access support services independently. Information about support services is provided on the [Goldsmiths website](#) and for new students through new starter information and induction/Welcome Week. Any support recommendations that are made are agreed with the student and communicated to the department so that adjustments to learning and teaching are able to be implemented at a department level and students can be reassured that arrangements are in place. Opportunities are provided for students to review their support arrangements should their circumstances change. The [Disability](#) and [Wellbeing](#) Services maintain caseloads of students and provide on-going support.

The [Careers Service](#) provides central support for skills enhancement, running [The Gold Award](#) scheme and other co-curricular activities that are accredited via the Higher Education Achievement Report ([HEAR](#)).

The [Centre for Academic Language and Literacies](#) works with academic departments offering bespoke academic literacy sessions. It also provides a programme of academic skills workshops and one-to-one provision for students throughout the year

Placement opportunities

SO53167A Sociology Work Placement is offered as an optional module at both Level 5 and 6 to maximise the possibility of student uptake. The central objective of the module is to enable students to take up a workplace learning experience designed to enhance their studies and by bringing theory and organisational practice together. The work placement you select can either be in-person or remote depending on your preference. Placements also help expand students' networks and provide valuable insights into potential work environments for after graduation, as well as the space and guidance to reflect on what it means to apply sociology to the contemporary world of work.

Prior to placement, in the Summer Term students attend a CV appointment and check with the Careers Service and sessions are delivered by the Module Convenor - as well as an

‘Employability Skills’ session with the Careers Service. The placement itself occurs between July – September; in Autumn Term, students receive two further lectures and tutorials, and the module assessment is completed during this term.

Assessment is via a Research Report (3000 words; 75% weighting) and oral presentation with supporting notes (20 mins; 25% weighting).

By the end of the module, students will be able to:

- Apply previously gained, theory-derived knowledge to provide a sociological perspective on the host organization
- Critically evaluate and apply the experiences they have acquired during placement to inform and enhance knowledge
- Demonstrate an insight into the working environment, as well as knowledge of the career options within an organisation, the competencies and traits required to enter these areas, and the ability to articulate response to these requirements
- Self-evaluate their placement experience, and articulate their transferable skills, values and personal traits
- Create a strategy for further skills development and career preparation
- Reflect critically on the role and effectiveness of an organization or field.

By the end of the module, students will also be expected to have developed a range of transferable skills, including the ability:

- To confidently communicate and discuss complex concepts and ideas
- To present logical arguments, to read and listen carefully and critically, and to offer critical assessments.
- To effectively apply learning and time management skills
- To work collaboratively as a member of a group
- To demonstrate the capacity for independent judgment and open-mindedness.
- To demonstrate information management skills.
- The ability to access and use a range of resources.

Employability and potential career opportunities

Students graduating from the BA (Hons) Sociology programme move on to a range of careers and employment areas, including the public and voluntary sector, the culture and media industries, marketing and corporate communications, arts administration, social research, teaching, and postgraduate study in sociology, politics, international relations, media, education, studies and related fields.

In your time at Goldsmiths, University of London, you will have the opportunity to develop a wide range of skills (through modules and student activities) which will be valuable in future. Within the BA Sociology programme, students will be encouraged to develop a range of transferable skills across the whole curriculum. They learn to reflect on their opinions, arguments and approaches with the aim of understanding how they can develop their own sociological arguments. They also have a variety of opportunities to develop skills in: planning and organising their time and managing assessment; developing academic, research, and writing skills; presenting their ideas to other people; working collaboratively; listening and responding constructively to the ideas and opinions of others; analysing problems and presenting solutions individually or in negotiation with other people; and learning to work and negotiate with people from different backgrounds, whom may have differing experiences and opinions from their own.

In addition, students are expected to develop:

- Reading, learning, research and study skills; including retrieval, selection and management of information from a variety of electronic and non-electronic sources
- The ability to express ideas and evidence clearly in written form, and in accordance with academic standards and guidelines (including managing the length of written work, identifying the sources of knowledge and attributing ideas accurately to these sources)
- Powers of verbal and written expression and presentation
- The ability to work on their own initiative, including learning about areas or methods for self-motivation
- Group-work skills, including communicating, negotiating and working with people from diverse backgrounds
- The ability to make judgements about the basis of different opinions, evidence, and claims
- Presentation skills, including skills in preparation

- Demonstrate knowledge and skills in a range of traditional and emerging research methods for sociological research
 - Knowledge and skills in a range of traditional and emerging research methods for sociological research
 - Demonstrate skills in problem-solving
- The ability to plan, design, manage and complete an independent project
