**Music**

**Programme overview**

The Graduate Diploma Programme is aimed at postgraduate students who need a year to develop or consolidate their language skills in academic English, to undertake preliminary study in the subject areas they would like to study at MA level, and to familiarise themselves both with ways of working in British academic culture and in the standards required at Master's degree level. Students who successfully complete the programme at the required level are guaranteed a place on a relevant Goldsmiths Master’s degree. Students who wish to go on to study elsewhere in the UK will be given the appropriate one-to-one tutorial support in their applications. The Graduate Diploma programme has five pathways: Creative and Cultural Industries (CCI); Design (D); Media, Culture and Social Sciences (MCSS); Music (M) and a Pre-Masters Certificate in Counselling and Therapy (CT).

This programme specification relates to the Music pathway. The programme consists of four major components:

A: Contemporary Theories; (30 credits); B: EAP Skills (30 credits); C: Interdisciplinary Option (30 credits, not applicable when specific pathway is 60 Credits, as in Design and Music); D: Specific Pathway Modules (30 credits)

**Programme entry requirements**

- Students must normally be 18 years of age on admission
- A minimum score of 5.5 in IELTS (with no sub score lower than 5.5) or equivalent in other English Language examinations
- Students must normally have already completed (or be about to finish) an undergraduate degree in their own country.
- Selection is by interview and/or submission of a portfolio of work or equivalent material.

**Aims of the programme**

The programme consists of four major components:
A: Contemporary Theories (30 credits); B: EAP Skills (30 credits); C: Interdisciplinary Option (30 credits, not applicable when specific pathway is 60 Credits, as in Counselling, Design or Music); D: Specific
Pathway Modules (30 credits).

The generic aims of the programme are for students to:

- experience learning in British higher education in a way that is both authentic and challenging;
- learn what is expected of students attending lectures in a UK university;
- learn about an academic subject at university level;
- learn what is expected of students in seminars and class discussion at a UK university;
- learn what is expected of students in written work at a UK university, including a range of text types and assessment criteria;
- learn to engage with and respond to teachers and fellow students from a range of disciplinary, cultural, and linguistic backgrounds;
- develop the skills necessary to become independent and life-long learners.

A and B are Core EAP modules (60 credits) in all pathways and consist of the following four skills:

Reading
The development of reading skills takes place principally in the pre-lecture and post-lecture textual analyses modules, which accompany the lecture module entitled: Contemporary Theories. Skills such as skimming, scanning, close reading and cohesion awareness are practised on texts drawn from a range of sources including from primary and secondary sources and encyclopedia entries on topics related to key areas of western thought. Texts are also exploited for relevant vocabulary extension. Students are encouraged to take a critical view of the texts under study by considering how they support and/or contrast with the content of the lecture programme or the students’ previous learning. Reading skills are also developed in similar ways in the interdisciplinary options.

Writing
The development of academic writing is closely integrated with reading. Texts are analysed in terms of their structure, organisation and language use, in order to help students understand what is required in their own writing, when they come to write essays related to the content of the lecture module. The development of summarising skills (distinguishing general and specific information, paraphrasing and synthesising) is also a main focus of these modules.

Writing skills are developed from a more discrete perspective in the Academic Writing/Grammar Development module. This covers the basic principles of essay writing (paragraph structure, paraphrasing and citation, referencing and bibliography compilation, drafting and editing) as well as focusing on specific aspects of sentence structure and syntax.

Writing skills are also developed in relation to a specific researched topic in the interdisciplinary option.

Listening
Students regularly attend the previously mentioned lecture module. They will practise and develop note-taking skills; develop knowledge and understanding of a relevant academic subject; and further develop appropriate vocabulary and grammar. Where possible, they will also audit undergraduate lectures, in order to familiarise themselves with the atmosphere of a British university lecture environment. Listening skills are also covered in the interdisciplinary option, and are of course practised de facto by students in their subject specific modules, as well as in their everyday student life. Listening skills will be specifically assessed in the formal examination relating to the core EAP units at the end of the programme, as well as through listening/ summary tasks in the modules.

Speaking
Speaking is of course a regular feature of all modules, and the variety of seminar types, visits, walks, etc organised in the subject specific pathways encourage this in a suitable diverse range of contexts. Specific attention to the skills of giving a seminar presentation will be paid in the core EAP modules,
where students develop the ability to plan, organise, carry out research and produce an oral presentation on an issue of interest to the student and, ideally, related to their future area of study. Presentations and seminar participation are also a key part of the learning, teaching, and assessment of the interdisciplinary options. Speaking skills will be assessed in the formal examination relating to the core EAP units at the end of the programme.

The subject specific modules of the programme offer students the opportunity to prepare for a specific pathways on the MA and MMus taught degrees by specialising either in performance and related studies, composition (electronic and instrumental), or musicology (including ethnomusicology, historical musicology, popular music). Students take one core module in their chosen specialist area and choose to complementary optional modules.

**What you will be expected to achieve**

Students who successfully complete the programme will be able to:

<table>

**How you will learn**

ELC and the Music Department are committed to a diverse and stimulating range of learning and teaching methods that ensure the programme outcomes are addressed rigorously and effectively. The programme provides a network of cross-referenced and cumulative knowledge delivered across the modules. This is further developed through your independent research and learning activities directed towards module assignments. You achieve the outcomes through the experience of interconnected teaching and learning strategies across these various elements of the programme, in both group and individual settings, which foster new understandings and further your existing skills. Cognitive and transferable skills are integral to your learning experiences across all elements of the programme.
The programme will combine a range of teaching methods and workshop-based practices relevant to the study of music. Programme outcomes that emphasise knowledge and understanding are developed in lecture-seminar sessions supported by tutorials, and where relevant, workshop sessions and one-to-one performance lessons. Practical and subject-related skills are developed, when appropriate, through one-to-one lessons in performance, group workshops and/or class based task. Class-based tasks may be done individually or in groups (including analytic, listening-based, or discursive exercises) or by setting up or reviewing follow-up tasks undertaken outside of class.

Learning and teaching is supported by a wide variety of practical activities that pertain to some aspects of the programme, including the Goldsmiths Sinfonia, the Chamber Choir, the Contemporary Music Ensemble, the Music Department's concert series, masterclasses, guest lectures, and events run by the Graduate Forum, Electronic Music Studios and the Department's various research centres and units.

1. Subject Knowledge and Understanding

The English language and academic skills development parts of the programmes will deliver the following learning outcomes:

Reading/Writing
The programme combines the type of learning situations that students can expect to encounter in a British university i.e. lectures, seminars and tutorials, with those more familiar to the language-learning environment, such as group work, pair work, and lab work. The importance of Independent Study for purposes of both academic research and language practice is emphasised. Given the wealth of reading material that students will be required to familiarise themselves with, they will be introduced to a wide range of reading strategies, as well as being made aware that they can use their reading to familiarise themselves also with textual cohesion strategies in writing. In the pre-lecture textual analysis class, for example, students will learn to analyse texts for the structure of their argumentation, how paragraphs and sentences are linked, and for their general academic organising vocabulary as well as key vocabulary related to the conceptual content. Writing development will be seen as an ongoing and pervasive part of the programme, and students will be encouraged, and required to write in a range of different text types, notably summaries both from listening and reading, short opinion pieces, reflective writing, and researched essays.

Listening
Students will attend weekly lectures on the topic: Contemporary Theories. They will also attend a range of different classes/lectures/ activity types, relevant to specialist study in music. Students are thus presented appropriate challenges suitable to prepare them for their future studies. In the lecture follow-up class, students will work sometimes individually or in small groups and sometimes with the whole class reviewing their understanding of the principal concepts of the lecture, developing their note-taking abilities, and improving their language skills, especially vocabulary.

Speaking
Students will attend and take part in a range of teaching and learning activities that will enable them to achieve the learning outcomes described above, including small group collaborative learning, task based learning, and whole group class work. Students are expected to make an active contribution in every class. Students will be taken through the stages of preparing a seminar presentation, and given the opportunity to present one to the rest of the class. When not presenting, students will be expected to ask appropriate questions or provide comments to the presenter. It will be emphasised that students should maximise their speaking opportunities outside of formal classes, and ideally keep a notebook for new vocabulary and expressions, how which expressions fit in which contexts, and generally develop their idiomatic as well as their formal registers.

2. Intellectual skills

Intellectual skills develop through the programme outlined above. Each module involves discussion of...
key issues, practice in applying concepts orally and in writing, analysis of conceptual material and feedback sessions.

3. Subject Specific skills

All students receive initial guidance on how to identify, locate and use music materials available in the library and on-line. Guidelines for the production of coursework essays are given out at the start of the programme. Strategies for study through the relevant language skills are taught explicitly and practised extensively throughout the programme. Other practical skills are taught, as necessary, in the modules run by the Music Department.

4. Transferable skills

All modules require written work and regular feedback on this is given to the student to develop their understanding and powers of expression. Skill D2 is developed through paired and group work including designating group leaders (on a rotating basis) to report back from discussions and through giving feedback to seminar presentations. Skill D3 is learnt through the management of time to meet various deadlines for submission of coursework. Skills D1 and D6 are developed in classes, seminars and tutorials, which rely on discussion and interaction, as well as presentations given by students. IT skills are developed through independent learning, and relevant learning resources support staff. Skills D7-D9 are germane to active engagement in the programme, and their general relevance will be stressed throughout.

How you will be assessed

All skills discussed above will be taught and assessed at a level appropriate for the Pathways.

1 Subject knowledge and understanding

Summative assessment of the programme outcomes occurs across the four major components. Individual modules use the most effective and appropriate assessment method according to the topic, and context within the given pathway.

The methods are either:
1. a project portfolio that demonstrates ability to undertake a number of focussed creative tasks with a short statement
2. an essay that demonstrates ability to apply to a set task, conduct independent research, produce an academic argument that can be supported by evidence and examples.
3. oral presentations relating to the subject of your future studies demonstrating evidence of research supported by secondary sources.

The learning outcomes are achieved and demonstrated in their most extensive and comprehensive form in all of the components that comprise the individual pathway. The methods are:

Reading/Writing

Students submit non-assessed written assignments on a regular basis. These will often be summaries, which test both reading comprehension and writing ability. At the end of each term they do an assessed summary and an essay. Similar assessed work is done in the interdisciplinary units also. The subject specific pathways require a range of assessment types as per the discipline concerned, and will make up 25% or 50% of the overall assessment as relevant. There is also an end of programme examination linked to the core EAP modules. The essay titles are based on specific purpose language work while the other reading and writing tasks conform to the assessment of use and understanding of English in tests such as the Cambridge/UCLES Certificate in Advanced English.
Listening
Students do one assessed listening summary in each term and also a number of non-assessed assignments, which help students to develop their listening skills. There is also an end of programme examination linked to the core EAP modules. The content of the texts chosen for summary will link to the specific purpose language work, and a shorter listening task will test the general use and understanding of English as in standard testing tasks, used for example in the Cambridge/UCLES Certificate in Advanced English.

Speaking
Students make one assessed class presentation at the end of each term, in both the core EAP and interdisciplinary modules. Non-assessed assignments will help them to develop their speaking and presentation skills. They will also help students to demonstrate their knowledge and understanding and develop their own opinions. Students will receive both general and individual feedback on their non-assessed work and presentations.

Formative assessment occurs in class discussion of tasks set, tutorial review of your progress, as well as written and oral feedback.

Intellectual skills
• The variety of assessment methods used, all place great emphasis on the student’s ability to demonstrate the ‘thinking’ skills through the production of coherent written and oral responses, which are relevant to the tasks set.

Practical skills
• Assessment is by a range of module assignments, researched essays and presentations and by written, listening, and speaking examinations.

Transferable skills
Effective communication of ideas is an important criterion in assessing all areas of a student’s work, and the regular feedback as well as the final mark reflects this. Assessment is by a range of module assignments and are designed to assess a range of specific conceptual content. These include researched essays and presentations, as well as written and listening examinations. Oral skills are assessed by the student giving a 10 minute presentation to two interlocutors under exam conditions.

**WRITTEN WORK**

Addressing the Title
Shows excellent understanding of title giving appropriate attention to defining terms, setting parameters. Addresses question throughout with no irrelevance.
Effective (review of issues in) conclusion.
Support of and Critical Approach to Ideas
Supports all main ideas or points of the argument, with relevant examples and/or evidence. Includes adequate, appropriate referencing. Analyses rather than describes, and shows an ability to evaluate main issues.
comprehensively. Positions her/himself successfully within the argument.

Organisation
A fully coherent essay which explicates the argument through logically related and clearly identified stages. There is a strong introduction which outlines the aims and organisation and a conclusion. There is no unnecessary repetition and organisational lexis is used throughout.

Accuracy
Uses a wide range of complex sentence structures accurately and appropriately. Spelling is nearly perfect.

Vocabulary and Style
Communicates effectively and appropriately using a formal academic style and a wide range of academic and subject-specific vocabulary.

ORAL PRESENTATIONS:

Academic Content
Presents a clearly focused argument, which shows strong support and independence of thought. Shows thorough analysis based on solid and wide-ranging research.

Organisation and Clarity of Ideas
Gives a fully coherent presentation on an academic topic, clearly structured, both within and between sections. The relationship between ideas is logically succinct and repetition is avoided.

Fluency and Interaction
Is in fluent control of communication in both general academic content and specific theoretical ideas. At ease in responding to and promoting interactive discussion.

Pronunciation and Intonation
Has very clear and accurate pronunciation of both discrete items of pronunciation (terminology, names) and interconnected speech. Near native speaker attainment of appropriate intonation patterns when enumerating and emphasising, for example.

Grammatical Accuracy and Vocabulary
Communicates with near native speaker accuracy and appropriacy using a wide range of vocabulary & structures suitable to the academic context.

CREATIVE AND TECHNICAL WORK:

Creative work demonstrates originality, individuality and coherence. Technique, theoretical understanding and imagination are integrated and aims are well formulated and of contemporary relevance. All materials and realisations are produced to a professional standard, in the form of music notation, studio production, performance or systems design, as relevant. Accompanying written work demonstrates effective engagement with critical approaches.

CLASSICAL PERFORMANCE:
The performer demonstrates technical mastery, a clear
A performance demonstrates an understanding of structure and a convincing musical interpretation that consistently holds the attention of the audience. Specific virtues, such as dexterity, flexible dynamics, secure intonation, timbral diversity and control, rhythmic accuracy and intelligent phrasing, are evident and deployed to excellent effect. The performer appears relaxed and confident. Technical exercises are near faultless.

**WRITTEN WORK**

**Addressing the Title**
Shows excellent understanding of title giving appropriate attention to defining terms, setting parameters. Addresses question throughout with no irrelevance. Effective (review of issues in) conclusion.

**Support of and Critical Approach to Ideas**
Supports all main ideas or points of the argument, with relevant examples and/or evidence. Includes adequate, appropriate referencing. Analyses rather than describes, and shows an ability to evaluate main issues comprehensively. Positions her/himself successfully within the argument.

**Organisation**
A fully coherent essay which explicates the argument through logically related and clearly identified stages. There is a strong introduction which outlines the aims and organisation and a conclusion. There is no unnecessary repetition and organisational lexis is used throughout.

**Accuracy**
Uses a wide range of complex sentence structures accurately and appropriately. Spelling is nearly perfect.

**Vocabulary and Style**
Communicates effectively and appropriately using a formal academic style and a wide range of academic and subject-specific vocabulary.

**ORAL PRESENTATIONS:**

**Academic Content**
Presents a clearly focused argument, which shows strong support and independence of thought. Shows thorough analysis based on solid and wide-ranging research.

**Organisation and Clarity of Ideas**
Gives a fully coherent presentation on an academic topic, clearly structured, both within and between sections. The relationship between ideas is logically succinct and repetition is avoided.
<table>
<thead>
<tr>
<th>60-69%</th>
<th>III: Upper Second (Very good)</th>
</tr>
</thead>
</table>

**Fluency and Interaction**
Is in fluent control of communication in both general academic content and specific theoretical ideas. At ease in responding to and promoting interactive discussion.

**Pronunciation and Intonation**
Has very clear and accurate pronunciation of both discrete items of pronunciation (terminology, names) and interconnected speech. Near native speaker attainment of appropriate intonation patterns when enumerating and emphasising, for example.

**Grammatical Accuracy and Vocabulary**
Communicates with near native speaker accuracy and appropriacy using a wide range of vocabulary & structures suitable to the academic context.

**CREATIVE AND TECHNICAL WORK:**
Creative work demonstrates originality, individuality and coherence. Technique,

Represents the overall achievement of the appropriate learning outcomes to a very good level.

**WRITTEN WORK**

- **Addressing the Title**
  As above but there may be slight lapses of focus in text.
  Effective conclusion.

- **Support of and Critical Approach to Ideas**
  Is competent at supporting and referencing major points although there may be one or two weaknesses. Analysis is generally apparent though there may be insufficient depth in a few places, or a little too much description. Explores most of the major issues and makes a good attempt at evaluating them, and positioning her/himself.

- **Organisation**
  A coherent essay that successfully explicates the argument although sections could on occasion be more clearly identified or more logically related. Unnecessary repetition is generally avoided. Good use of organisational lexis.
  Contains an appropriate introduction and conclusion.

- **Accuracy**
  Uses a wide range of complex sentence structures accurately and appropriately with only minor errors.
  Only minor errors in spelling also.

- **Vocabulary and Style**
  Communicates quite effectively and appropriately using a formal academic style and a reasonable range of academic and subject-specific vocabulary. Some errors may occur.

---

---

---
when using complex language but these do not impede understanding.

**ORAL PRESENTATIONS:**

Academic Content
Shows well focused main argument with good support. Effective analysis based on appropriate research.

Organisation and Clarity of Ideas
Gives a coherent presentation on an academic topic, but structuring either within or between sections could be clearer. The relationship between ideas is evident but could be more succinct. Repetition is generally avoided.

Fluency and Interaction
Good communication in general academic content and with expression of theoretical ideas. Occasional difficulty and hesitancy in interactive discussion.

Pronunciation and Intonation
Has a generally competent level of pronunciation and intonation but with some minor lapses.

Grammatical Accuracy and Vocabulary
Communicates accurately and appropriately using a wide range of vocabulary & structures suitable to the academic context. Some errors may occur when using complex language but these do not impede communication.

**CREATIVE AND TECHNICAL WORK:**
Creative work demonstrates clear signs of coherence and individuality. There is a confident use of a wide range of relevant techniques, explored rigorously and with imagination. Work is informed by contemporary and relevant theoretical ideas.

</table>
| **Addressing the Title**  
Some attempt evident to address title but held back by irrelevance and/or weak conclusion. Inappropriate length.  
**Support of and Critical Approach to Ideas**  
Makes an attempt to follow academic notions of support and critical approach but sometimes falls down in terms of consistency, appropriacy, analytical skills, or length.  
**Organisation**  
Attempts to organise the essay into sections that identify and explicate the argument, although these may be difficult to identify or may be illogically related. Some use of organisational lexis and an attempt at an introduction and conclusion.  
**Accuracy**  
Uses a satisfactory range of sentence structures and may contain errors. There may be frequent spelling errors.  
**Vocabulary and Style**  
Uses a satisfactory range of vocabulary but may lack or misuse the appropriate language and subject-specific terminology. Errors sometimes impede understanding and the style may not be appropriate.  
|
| **Academic Content**  
Shows attempt at argument, although may be inconclusive due to lack of in-depth research, resulting in a tendency to over-rely on description.  
**Organisation and Clarity of Ideas**  
Makes an attempt at structuring a presentation on an academic topic, but the delivery is affected by some poor organisation, either of sections, or of ideas. May be repetitious or lack cohesive markers.  
**Fluency and Interaction**  
Able to communicate in general academic content but some difficulty with theoretical ideas. Some inappropriate hesitation and inconsistent interactive skills.  
**Pronunciation and Intonation**  
Communicates in part but is sometimes unsuccessful due to the problems listed above.  
**Grammatical Accuracy and Vocabulary**  
Uses an adequate range of vocabulary & structures but may lack or misuse appropriate language and subject-specific terminology. Errors sometimes impede communication.

</table>

CREATIVE AND TECHNICAL WORK:
Creative work demonstrates a satisfactory understanding of techniques, with some evidence of imaginative application. All materials and realisations are produced to an acceptable standard. Accompanying written work shows understanding of the work’s methods and aims.

CLASSICAL PERFORMANCE:
The voice or instrument is controlled satisfactorily, but inconsistently.

30-39%
30-39%
Represents an overall failure to achieve the appropriate learning outcomes.

WRITTEN WORK

Addressing the Title
Title poorly addressed leading to lack of coherent focus. May resort to descriptive writing.

Support of and Critical Approach to Ideas
There are a few signs that the student can support, reference, analyse, evaluate or position her/himself but these are undeveloped or inconsistent. The essay may be short due to such weaknesses.

Organisation
Some attempt to organise the argument into sections, but unclear and illogical organisation results in unnecessary repetition and makes the argument difficult to follow. Little use of organisational lexis. Some difficulty in clearly identifying either an introduction or conclusion.

Accuracy
Uses an inadequate range of sentence structures, contains several errors and spelling is weak.

Vocabulary and Style
Uses a limited range of vocabulary. Errors are clearly evident and frequently impede understanding. There may be noticeable inconsistencies in voice.

ORAL PRESENTATIONS:

Academic Content
Content mostly descriptive, although some attempt at constructing analysis. General lack of focus of argument showing little or no research.

Organisation and Clarity of Ideas
 Barely able to structure a presentation on an academic topic. Neither the structuring between or within sections is clear and the delivery lacks overall

Academic Content |
How the programme is structured

This programme takes place over an academic year. Most of the delivery takes place in the Autumn and Spring terms (eleven weeks each, with a ‘reading’ week to devote to assignments in week 6). At the beginning of the Summer term, time is devoted to exam preparation and final tutorials. The examination normally takes place towards the end of May/beginning of June. There may be other activities going on in the University that students can make use of, such as the PureGold music festival, as well as a number of other departmental activities, which the subject specific tutors can alert students to. The programme of study has four main components. This includes 2 core modules in English for Academic Purposes; 1 core interdisciplinary module in music and two optional modules in music. The music modules chosen must relate to the intended future degree and agreed in consultation with a tutor in the Music department.

The 2 core EAP modules are assessed by coursework and an examination comprising 3 unseen papers and an Oral examination. The remaining modules are assessed via a variety of methods which include, for example, essays and reflective journals. The programme has a total of 4 modules which are

<table>
<thead>
<tr>
<th>%</th>
<th>Description</th>
<th>Mark</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-9%</td>
<td>Very bad fail</td>
<td>A submission that does not even attempt to address the specified learning outcomes (shall be deemed a non valid attempt and module must be re-sat).</td>
</tr>
<tr>
<td>0%</td>
<td>Non submission or plagiarised</td>
<td>A categorical mark representing either the failure to submit an assessment or a mark assigned for a plagiarised assessment.</td>
</tr>
</tbody>
</table>

Content purely descriptive. No attempt at analysis or personal argument. No definition or focus of topic. No research.

Organisation and Clarity of Ideas
Fails to structure a presentation on an academic topic. Very little coherence between ideas.

Fluency and Interaction
Unable to maintain coherent communication in academic content. Frequent pauses and prompts needed. Clear evidence of memorisation or reading of notes. Unable to interact.

Pronunciation and Intonation
Is largely unintelligible due to major and repeated errors of pronunciation and intonation.

Grammatical Accuracy and Vocabulary
Lacks necessary vocabulary/structures for basic communication and makes very frequent errors.

CREATIVE AND TECHNICAL WORK:
This will demonstrate inadequate technical competence, imaginative thinking or conceptual coherency. Relevant materials will be inadequately produced.

CLASSICAL PERFORMANCE:
There is a significant lack of control of the voice or instrument, with little or no evidence of musical understanding.
weighted at 25% each. The pass mark is 40% and a pass in all modules must be achieved. Progression to an MA or MMus in the Music department is subject to interview and achieving an overall mark of 50%.

ELC and the Music Department have a good record of managing programmes for International students, which have been in operation since 1993. Central co-ordination and overview of the programmes, as well as personal tutoring of the students will be undertaken by the both departments. Programme Convenors will also offer group tutorials and one-to-one tutorials where necessary.

Academic support

Support for learning and wellbeing is provided in number of ways by departments and College support services who work collaboratively to ensure students get the right help to reach their best potential both academically and personally.

Students are allocated a personal tutor and a Senior Tutor in each department has overall responsibility for student progress and welfare. Departments arrange regular communication to students in the form of mailings and meetings as well as regular progress reports and feedback on coursework and assignments. This is in addition to scheduled seminars, tutorials and lectures/workshops.

Personal tutors will invite students to meet in the first two weeks of a new term and regularly throughout the duration of a programme of study. These meetings aim to discuss progress on modules, discussion of the academic discipline and reports from previous years if available (for continuing students). This way progress, attendance, essay/coursework/assessment marks can be reviewed and an informed discussion can be about how to strengthen learning and success.

Students are sent information about learning resources in the Library and on the VLE so that they have access to programme handbooks, programme information and support related information and guidance. Timetables are sent in advance of the start of term so that students can begin to manage their preparation and planning.

Taught sessions and lectures provide overviews of coursework themes, which students are encouraged to complement with intensive reading for presentation and discussion with peers at seminars. Coursework
essays build on lectures and seminars so students are encouraged to attend all taught sessions to build knowledge and their own understanding of their chosen discipline.

In depth feedback is provided for written assignments and essays via written feedback forms and formative feedback with module tutors/leads is provided to ensure that students' work is on the right track. Feedback comes in many forms and not only as a result of written comments on a marked essay. Students are given feedback on developing projects and practice as they attend workshops and placements.

A peer assisted learning (PAL) scheme is in place so that first year students have the opportunity to link with a second year student who can offer support and their experience on a range of academic related issues. This support is department based so students have a common understanding of subject based knowledge.

Students may be referred to specialist student services by department staff or they may access support services independently. Information about support services is clearly provided on the College Website and as new students join Goldsmiths through new starter information and induction/Welcome Week. Any support recommendations that are made are agreed with the student and communicated to the department so that adjustments to learning & teaching are able to be implemented at a department level and students can be reassured that arrangements are in place. Opportunities are provided for students to review their support arrangements should their circumstances change. The Inclusion & Learning Support and Wellbeing Teams maintain case loads of students and provide on-going support.

The Careers Service and the Academic Skills Centre provide central support for skills enhancement and run the Gold Award Scheme and other co-curricular activities that can be accredited via the higher education achievement award (HEAR)

Links with employers, placement opportunities and career prospects

The majority of students who study for the Graduate Diploma in Music normally proceed to Postgraduate programmes within the Music Department. Specifically, the Graduate Diploma in Music is designed for students who wish to progress onto one of the pathways on the MA and MMus degrees offered by the Music Department.

The requirements of a Goldsmiths degree

Undergraduate degrees:
Undergraduate degrees have a total value of 360 credits. They are composed of individual modules, each of which has its own credit value. Full-time students take modules to the value of 120 credits each year and part-time students not less than 45 credits and not more than 90 credits each year. Each full-time year corresponds to a level of the Framework for Higher Education Qualifications.

Year 1 = Level 4
Year 2 = Level 5
Year 3 = Level 6

Modules:
Modules are defined as:
“Optional” – which can be chosen from a group of modules
“Compulsory” – which must be taken as part of the degree
“Core” – which must be taken as part of the degree and passed with a mark of at least 40%.

Progression:
Full-time students are required to have passed modules to a minimum of 90 credits before proceeding
to the next year. Part-time students normally must pass new modules to a minimum value of 45 credits before proceeding to the next year.

In addition, some programmes may specify particular modules which must be passed, irrespective of the minimum requirements, before proceeding to the next year.

Award of the degree:
In order to graduate with a classified degree, students must successfully complete modules to the value of 360 credits. However if a module which has not be defined as “core” has been failed with a mark of 35-39% and all three permitted attempts have been used, this module may be compensated (treated as if it has been passed) so long as the average mean mark for all 120 credits at that level is 45% or above. No more than 60 credits may be compensated this way across a programme and no more than 30 at any one level.

Classification:
Final degree classification will be calculated on the basis of a student's best marks for modules equivalent to 90 credits at Level 4, 105 credits at level 5 and 105 credits at level 6, applying a relative weighting of 1:3:5 to modules at level 4, 5 and 6 respectively.

Degrees are awarded with the following classifications: First Class – 70%+
Upper Second – 60-69%
Lower Second – 50-59%
Third – 40-49%

Students who, following the application of compensation and having used all their permitted resit attempts, have passed modules to the value of 300-345 credits, at least 60 of which are at level 6 may be awarded a pass degree.

Intermediate Exit Points:
Some programs incorporate intermediate exit points of Certificate of Higher Education and Diploma of Higher Education, which may be awarded on the successful completion of modules to the value of 120 credits at level 4 or 240 (120 of which at level 5) credits respectively. The awards are made without classification.

The above information is intended as a guide. For further information, please refer to the Regulations for Undergraduate Students, which may be found here: http://www.gold.ac.uk/governance/studentregulations/

Programme-specific rules and facts

The 2 core EAP modules are assessed by coursework and an examination comprising 3 unseen papers and an Oral examination. The remaining modules are assessed via a variety of methods, which include, for example, essays and reflective journals. The programme has a total of 4 modules, which are weighted at 25% each.

The pass mark is 40%. Students must pass all modules of the programme to be awarded the Graduate Diploma.

The offer of a place on one of the Music MA or MMus programmes will be subject to application and interview during the Graduate Diploma year. All Graduate Diploma students will be guaranteed an interview and will be given suitable advice about progression to Music PGT level programmes.

How teaching quality will be monitored
Goldsmiths employs a number of methods to ensure and enhance the quality of learning and teaching on its programmes.

Programmes and modules must be formally approved against national standards and are monitored throughout the year in departmental staff/student forums and through the completion of module evaluation questionnaires. Every programme also has at least one External Examiner who produces an annual report which comments on the standards of awards and student achievement.

This output is considered with other relevant data in the process of Annual Programme Review, to which all programmes are subject, and which aims to identify both good practice and issues which require resolution.

Every six years all programmes within a department are also subject to a broader periodic review. This aims to ensure that they remain current, that the procedures to maintain the standards of the awards are working effectively and the quality of the learning opportunities and information provided to students and applicants is appropriate.

Detailed information on all of these procedures are published on the webpages of the Quality Office (http://www.gold.ac.uk/quality/).
