Programme overview

This programme specification summarises the MA degree in International Relations (MA IS) offered in the Politics and International Relations Department at Goldsmiths, University of London, identifying learning outcomes and skills that a typical student should have achieved and developed by engaging fully in the learning process that is offered. Further details of the programme can be found online at www.gold.ac.uk and in the Departmental handbook for the MA International Relations.

At the centre of world politics today are a range of new issues: the global ‘war on terror’ the need to develop security frameworks which can meet the challenges set by international terrorist networks, and rising levels of ethnic and civic conflict; the ongoing crisis in core units of global governance; the emergence of human rights and humanitarian intervention which challenge taken-for-granted conceptions about international order, and concerns about human security issues which arise from high levels of environmental degradation and the spread of infectious diseases such as HIV/AIDS. The MA in International Relations provides students with the opportunity to explore these issues in an interdisciplinary setting, using a strong theoretical basis in order to better understand a range of empirical issues. The programme aims to promote independent critical and evaluative skills as well as an intellectual curiosity in international relations. It seeks to expand students’ knowledge of the issues which make up contemporary world politics, and provide them with a deep level of understanding into the many facets which lie behind contemporary international politics.

Programme entry requirements

Students should normally have successfully completed an undergraduate programme in a relevant subject and obtained a good grade in their final papers (usually an Upper Second Class Honours). However, the Politics and International Relations Department is committed to widening participation in its degree programmes, including taught postgraduate modules, and welcomes applications from those who have a substantial amount of relevant work experience, but who lack formal qualifications. In such cases entrance is by interview/portfolio or equivalent evidence of research interests as well as the submission of an essay on a topic determined by the department. Applicants who do not have the relevant first degree are encouraged to approach the department informally before submitting an application.
Aims of the programme

The educational aims of the programme are informed by Goldsmiths' declared focus on stimulating knowledge and self-discovery through creative, radical and intellectually rigorous thinking and practice; the Politics Subject Benchmarking Statements; the QAA Code of Practice; the National Qualifications Framework; and the Goldsmiths Learning and Teaching Strategy.

The main purpose of the programme is to provide students with a thorough grounding in the principles of social research as applied to the substantive fields of International Relations and International Politics. It is designed to equip students with the tools necessary to understand International Relations and International Politics to a level appropriate to progression to doctoral level, employment in policy-related research or in research management in both national and international organisations. The module also provides opportunities to explore a range of topics in the field of political ideas, political and social theory through a variety of options modules.

What you will be expected to achieve

The learning outcomes for the programme (listed below) include knowledge, cognitive, and transferable skills which are widely sought and generally expected from students who have successfully completed a postgraduate programme of study in the social sciences as well as skills and understandings that are more subject specific.

How you will learn
The department is strongly committed to the use of seminars in delivering its curriculum at post-graduate level, and in engaging its students in the learning process. All modules provide students with an opportunity to participate in discussions designed to explore and reinforce the knowledge they have gained through reading and making presentations. Seminars use a range of methods including lectures, student presentations, group work, brainstorming sessions and, on occasion, short quizzes. Specifically, seminars provide an environment in which students will acquire and demonstrate knowledge & understanding skills outlined in A1-4, cognitive & thinking skills outlined in B 1-3, subject specific skills outlined in C1-4, and transferable skills outlined in D1, D3, D5-6.

In addition to timetabled teaching, students obtain support from academic staff by discussing their work with staff during regular office hours and tutorials. Tutorials help to inculcate subject specific learning outcomes C1-4 and provide an environment in which students can demonstrate and discuss the requisite knowledge and understanding skills in A1-4 along with cognitive & thinking skills in B1-4. Tutorials provide a conducive environment for the learning and teaching of transferable skills D1, D3 and D4, focusing particularly on the preparation for, and feedback from, assessed (summative) and (formative) unassessed essays.

Each full-time member of the academic staff offers at least two guaranteed office hours per week during term time. Support for independent study is constantly being developed and improved, and students now benefit from the wide range of facilities available in the Rutherford Information Services Building (RISB). The RISB provides access to and advice on the use of a wide range of library and electronic resources. Students have access to the British Library’s social science holdings, and the libraries at the London School of Economics and Senate House which together hold an extensive collection of books and journals in the field of International Relations. The department enjoys corporate membership of the Royal Institute of International Affairs (Chatham House). This allows students the chance to benefit from the many events hosted by Chatham House as well as use its library which holds an excellent stock of subject specific material. In addition, a wide range of audio-visual materials are available to all postgraduate students within the RISB collection.

**How you will be assessed**

Outcomes are assessed – both summatively and formatively – through coursework, presentations, written papers, and the dissertation. Student skills in expressing himself/herself in writing are strongly promoted across the programme by the requirement to submit written work in the form of assessed coursework. In order to obtain the degree, students must achieve at least a Pass in each of the modules that make up the degree programme.

The assessment strategy for the core modules is an in-depth 4,000-5,000 word essay that is designed in consultation with a staff member. Students also submit a 10,000 word dissertation at the end of the module on a topic which is conducted under the supervision of a member of staff. The criteria for assessing written work are set out clearly in the programme handbook and underline the importance attached by staff to clear expression, informed argument and a rigorous, analytical approach to the study of international politics.

Specifically, subject specific skills C1-4 are assessed in coursework essays and the dissertation insofar as the demonstration of these learning outcomes provides evidence that students have acquired the requisite knowledge to be awarded the degree. Knowledge & understanding skills A1-4 and cognitive & thinking skills B1-5 are also assessed by the dissertation and the course essays with particular attention in essays and the dissertation to the achievement of B4 and B5. Transferable skills D2-5 are assessed through all forms of assessment on the course. Skills D7-10 pertain especially to the coursework essays and the dissertation. The oral communication skills in D1 are assessed formatively via seminar presentations and discussions as are the group skills identified in D6.
### Marking criteria

<table>
<thead>
<tr>
<th>Mark</th>
<th>Descriptor (Outstanding/Exceptional)</th>
<th>Specific Marking Criteria</th>
</tr>
</thead>
</table>
| 80-100%    | Distinction                          | Represents the overall achievement of the learning outcomes and the skills below to an exceptional level:  
• Clear and logical argument with appropriate linkages  
• Analytical use of key concepts in exposition  
• Appropriate location in relevant literature  
• Relation of theoretical and empirical material  
• Location of subject within a wider framework of debate  
• Good use of theory in structuring hypotheses  
• Skilled application of selected research techniques  
• Thorough organisation and planning  
• Location and use of source materials  
• Implementation of strategies for collecting information  
• Clarity of expression and appropriate use of language  
• Accuracy in spelling, grammar and punctuation  
• Consistency and thoroughness in referencing and bibliography |
| 70-79%     | Distinction                          | Represents the overall achievement of the learning outcomes and the skills below to an excellent level:  
• Clear and logical argument with appropriate linkages  
• Analytical use of key concepts in exposition  
• Appropriate location in relevant literature  
• Relation of theoretical and empirical material  
• Location of subject within a wider framework of debate  
• Good use of theory in structuring hypotheses  
• Skilled application of selected research techniques  
• Thorough organisation and planning  
• Location and use of source materials  
• Implementation of strategies for collecting information  
• Clarity of expression and appropriate use of language  
• Accuracy in spelling, grammar and punctuation  
• Consistency and thoroughness in referencing and bibliography |
| 60-69%     | Merit                                | Represents the overall achievement of the appropriate learning outcomes to a good level. There will be very good use of many or most of features outlined above. However some aspects will be less fully realised. The work will not be as strongly original, distinctive or individual as a 70%+ grade answer.  
• Overall structure of the argument is clear and coherent  
• Evaluative use of key concepts  
• Location of argument within relevant literature  
• Awareness of relation between theory and empirical data  
• Knowledge of position of subject matter in wider debates  
• Use of theoretical material in structuring hypotheses |
<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
<th>Additional Comments</th>
</tr>
</thead>
</table>
| 50-59% | Pass | Represents the overall achievement of the appropriate learning outcomes to a threshold level. There will be good use of some of the features of a 70%+ grade answer. However, some elements will be only partially realised. The work will not contain any serious omissions or irrelevancies.  
- Most of the argument will be clearly structured  
- Understanding and recognition of key concepts  
- Recognition of most of the relevant literature  
- Limited, though fairly sound, use of theory and empirical data  
- Some understanding of wider debates surrounding the subject  
- Limited use of theory in structuring hypotheses  
- Satisfactory use of chosen research methods  
- Reasonable organisation and planning  
- Accessing some relevant sources  
- Limited use of strategies for collecting information  
- Reasonably clear expression  
- Mostly correct spelling, grammar and punctuation  
- Referencing and bibliography broadly in line with guidelines |
| 30-49% | Fail | Represents an overall failure to achieve the appropriate learning outcomes. There may be errors, omissions or irrelevancies and significant elements of the learning outcomes and skills will be unmet.  
- Unclear structure and logical progression  
- Limited understanding of key concepts  
- Limited recognition of relevant literature  
- Uneven use of theoretical and empirical materials  
- Little understanding of wider debates surrounding the area  
- Uneven application of theory in structuring hypotheses  
- Uneven application of selected methods  
- Limited organisation and planning  
- Limited accessing of relevant sources  
- Lack of clarity in expression  
- Mistakes in spelling, grammar and punctuation which impede clarity  
- Referencing and bibliography only partially accurate |
| 10-29% | Bad fail | Represents a significant overall failure to achieve the appropriate learning outcomes. Students will show minimal |
or no evidence of knowledge or understanding of key themes and issues. The work will suffer from one or more of the following:
- Structure and logic are weak and muddled
- Very limited understanding of key concepts
- Little recognition of relevant literature
- Little use of theoretical and empirical material
- Very little understanding of the subject in the context of wider debates
- Very limited application of theory in structuring hypotheses
- Poor application of selected research methods
- Disorganised research and lack of planning
- Little accessing of relevant sources
- Unclear expression which distorts argument
- Many mistakes in spelling, grammar and punctuation
- Little accuracy in referencing and bibliography

<table>
<thead>
<tr>
<th>1-9%</th>
<th>Very bad fail</th>
</tr>
</thead>
</table>
| A submission that does not address the specified learning outcomes (shall be deemed a non-valid attempt and the unit must be re-sat). The work will suffer in some degree from most or all of the characteristics below:
- Structure and logic are very unclear
- Little or no understanding of key concepts
- Very poor or no recognition of relevant literature
- Very poor or no use of theoretical and empirical material
- No recognition of subject in the light of wider debates
- Poor application of theory in structuring hypotheses
- Very poor application of selected research methods
- Very poor organisation and planning
- Very poor or no accessing of relevant literature
- Very unclear expression which distorts argument
- Very poor spelling, grammar and punctuation
- No referencing or bibliography |

<th>Non submission or plagiarised</th>
</tr>
</thead>
<tbody>
<tr>
<td>A categorical mark representing either the failure to submit an assessment or a mark assigned for a plagiarised assessment.</td>
<td></td>
</tr>
</tbody>
</table>

**How the programme is structured**

The programme is available in full-time (1 year) and part-time (2 years) modes. All students must complete modules to a value of 120 credits and a dissertation with a value of 60 credits.

Part-time students take the core module Theories of International Relations (30 credits), plus a further 30 credits in their first year. In their second year, they take their dissertation and modules to a value of 30 credits. The dissertation must be completed and submitted by mid-September of the year of completion.

Optional modules

You choose modules to the value of 90 credits from:
Either a list provided by the Department of Politics and International Relations at the beginning of the academic year. Or
A combination of modules from:
• A list provided by the department at the beginning of the academic year, and
• Other modules from other departments in the college approved by the Department of Politics and International Relations, but not amounting to more than 30 CATS from outside the Department of Politics and International Relations.

Progression Requirements
Part-time candidates will normally be required to have passed the core module before proceeding to the second year.

Academic support

Support for learning and wellbeing is provided in number of ways by departments and College support services who work collaboratively to ensure students get the right help to reach their best potential both academically and personally.

Students are allocated a personal tutor and a Senior Tutor in each department has overall responsibility for student progress and welfare. Departments arrange regular communication to students in the form of mailings and meetings as well as regular progress reports and feedback on coursework and assignments. This is in addition to scheduled seminars, tutorials and lectures/workshops.

Personal tutors will invite students to meet in the first two weeks of a new term and regularly throughout the duration of a programme of study. These meetings aim to discuss progress on modules, discussion of the academic discipline and reports from previous years if available (for continuing students). This way progress, attendance, essay/coursework/assessment marks can be reviewed and an informed discussion can be about how to strengthen learning and success.

Students are sent information about learning resources in the Library and on the VLE so that they have access to programme handbooks, programme information and support related information and guidance.
Timetables are sent in advance of the start of term so that students can begin to manage their preparation and planning.

Taught sessions and lectures provide overviews of coursework themes, which students are encouraged to complement with intensive reading for presentation and discussion with peers at seminars. Coursework essays build on lectures and seminars so students are encouraged to attend all taught sessions to build knowledge and their own understanding of their chosen discipline.

In-depth feedback is provided for written assignments and essays via written feedback forms and formative feedback with module tutors/leads is provided to ensure that students’ work is on the right track. Feedback comes in many forms and not only as a result of written comments on a marked essay. Students are given feedback on developing projects and practice as they attend workshops and placements.

Students may be referred to specialist student services by department staff or they may access support services independently. Information about support services is clearly provided on the College Website and as new students join Goldsmiths through new starter information and induction/Welcome Week. Any support recommendations that are made are agreed with the student and communicated to the department so that adjustments to learning & teaching are able to be implemented at a department level and students can be reassured that arrangements are in place. Opportunities are provided for students to review their support arrangements should their circumstances change. The Inclusion & Learning Support and Wellbeing Teams maintain case loads of students and provide on-going support.

The Careers Service provides central support for skills enhancement, running the Gold Award Scheme and other co-curricular activities that are accredited via the higher education achievement award (HEAR).

The Academic Skills Centre works with academic departments offering bespoke academic literacy sessions. It also provides a programme of academic skills workshops and one-to-one provision throughout the year, which students can access directly at gold.ac.uk/eas/.

**Links with employers, placement opportunities and career prospects**

The MA International Relations programme is likely to prove especially attractive to those with interests in the field of world politics who are considering further study at the PhD level or careers in areas such as diplomatic service or international organisations where an understanding of international politics is essential. The programme also offers valuable theoretical background and analytical skills for those working in international corporations, NGOs, defence industries and many areas of government.

Students on the MA IS programme also have the opportunity to take a work placement programme, which constitutes one of the optional modules to the value of 30 CATS. This module gives students the chance to work with a host organisation for two days a week over the Spring term. They then reflect on their experience and the kind of work with which they have been involved in an assessed essay. In the past, students have worked in a wide variety of placements, largely derived from a pool that has been developed by the Politics and International Relations department over recent years. The department works hard to ensure a good link between students’ interests and their placement. In recent years, students have worked at a wide range of organisations, from small development NGOs to international consultancies. This enables students to gain invaluable experience and allows them to develop their CVs at a critical time. It has proved a popular module on the course.

**The requirements of a Goldsmiths degree**

Master’s Degrees
All Master’s degrees at Goldsmiths have a minimum value of 180 credits. Programmes are comprised
of modules which have individual credit values. In order to be eligible for the award of a Master's degree students must have passed all modules on the programme.

Intermediate Exit Points
Some programmes incorporate intermediate exit points of Postgraduate Certificate and Postgraduate Diploma, which may be awarded on the successful completion of modules to the value of 60 credits or 120 credits respectively. Individual programmes may specify which, if any, combination of modules are required in order to be eligible for the award of these qualifications. The awards are made without classification.

Final Classification
There are four possible categories of final classification for Master's degrees: Distinction, Merit, Pass and Fail.

For further information, please refer to the Regulations for Postgraduate Taught Students, which may be found here: http://www.gold.ac.uk/governance/studentregulations/

Programme-specific rules and facts

Deferment and re-entry
Deferment of any part of the examination, including submission of the assessed essays and the dissertation, may be granted for reasons judged adequate by the College. The Chairperson of the relevant Sub-Board shall be empowered to grant deferrals on proven grounds of ill health or death of a near relative. The College Board of Examiners shall consider all applications for deferrals made on any other grounds. Entry to deferred parts of the examination shall be on the next occasion when the examination is normally held. A candidate wishing to defer shall make the application in writing to the Chairperson of the relevant Sub-Board. The outcome of the request for deferrals shall be conveyed in writing to the student by the Examinations Officer and reported at the next Sub-Board. A candidate who does not successfully complete the examination for which he/she has entered, may, subject to the agreement of the Head of Department, when such re-entry would involve further attendance at the College, re-enter that examination on one occasion. Unless otherwise specified such re-entry will be at the next examination except when the College has granted permission to a candidate to defer re-entry until the examination is held in a subsequent year.

How teaching quality will be monitored

Goldsmiths employs a number of methods to ensure and enhance the quality of learning and teaching on its programmes.

Programmes and modules must be formally approved against national standards and are monitored throughout the year in departmental staff / student forums and through the completion of module evaluation questionnaires. Every programme also has at least one External Examiner who produces an annual report which comments on the standards of awards and student achievement.

This output is considered with other relevant data in the process of Annual Programme Review, to which all programmes are subject, and which aims to identify both good practice and issues which require resolution.

Every six years all programmes within a department are also subject to a broader periodic review. This aims to ensure that they remain current, that the procedures to maintain the standards of the awards are working effectively and the quality of the learning opportunities and information provided to students and applicants is appropriate.

Detailed information on all of these procedures are published on the webpages of the Quality Office.
(http://www.gold.ac.uk/quality/).
