MA/MSc Digital Journalism
Programme Specification

Awarding Institution:
University of London (Interim Exit Awards made by Goldsmiths’ College)

Teaching Institution: Goldsmiths, University of London

Name of Final Award and Programme Title: MA/MSc Digital Journalism

Name of Interim Exit Award(s):
Postgraduate Certificate in Digital Journalism
Postgraduate Diploma in Digital Journalism

Duration of Programme: 1 year full-time or 2 years part-time

UCAS Code(s): Not applicable

HECoS Code(s):
(100442) Journalism 50%
(100366) Computer Science 50%

QAA Benchmark Group: Not applicable

FHEQ Level of Award: Level 7

Programme accredited by: Not applicable

Date Programme Specification last updated/approved: September 2017

Home Department: Media, Communications and Cultural Studies

Department(s) which will also be involved in teaching part of the programme:
Computing

Programme overview

Journalism is changing rapidly to deal with fundamental changes in technology and in the way people access and disseminate information using the World Wide Web and portable electronic media. The MA/MSc in Digital Journalism has been specifically developed to create graduates who will not only be able to deal with current technologies as they affect journalistic practice, but will also have the necessary deep understanding and skill to adapt to future technologically-informed changes in practice and, in some cases, to develop the technologies that will bring about these changes.

Students will receive highly specialised training in digital technologies, enabling them to develop technical and editorial skills in all aspects of computer-supported news gathering and digital media production. The goal of the program is for its graduates to help produce, shape, refresh, and reinvent journalism in fast-changing mobile and global media. The
program will offer the highest calibre of journalism and computing science training. Students will learn the fundamentals of multimedia journalism while developing an enterprising capability and literacy in computer science. This program design will use the content of each discipline to inform the execution of the other. Under the guidance of senior faculty staff and visiting specialists, students will combine creative computing software and code with journalistic methods to harness data and produce applications promoting new information and communication models for media organisations and the creative industries.

Graduates of the programme will be capable of occupying a specialist role of "coding journalist" or "multimedia journalist" in the media, non-profits, PR, and technology organisations and developing entrepreneurial start-up projects. The MADJ is a 180-credit programme consisting of three 30 credit modules, three 15-credit modules and a 60 credit final project (non-traditional thesis) in terms of compulsory modules. Students also have the option of doing the 30 credit module Media law and Ethics or undertaking a 15 credit version of this module plus the 15 credit module Asking the Right Questions.

Programme entry requirements

The programme is designed to take students with different histories and skills: those with a strong technical background and in interest in Journalism, and those with a journalistic background and in interest in what new technologies offer to journalism. The degree denomination (MA or MSc) will be determined by the relative stress put on technology and journalistic practice in the final Major Practical Project. All students will be expected to engage with both.

All students would normally have, or be expected to gain, a first degree of at least second class or equivalent; a lower degree class may require an additional viva or written examination. Students without these formal academic qualifications would be eligible for admission if they have relevant industrial experience at a senior level, for example as software designers or as practising journalists, although this may be also subject to a qualifying examination or viva.

It is expected that the programme will attract approximately 50% overseas students. Non-native English students should normally have a minimum IELTS score of 7.0 or equivalent. Students with IELTS scores under 7.0 will be strongly encouraged to do the College pre-sessional training in English language. Students may be called to interview.

Aims of the programme

1. Study the skills, art, and ethics of digital journalism combining critical thinking and multimedia narrative construction with technical training in the ability to create
problem solving or information retrieval applications and synthesise data into relevant content.

2. Develop their abilities to report/write and create multimedia clearly, precisely, accurately, with energy and voice, and for specific online audiences.

3. Be provided with a comprehensive resource for mobile and online journalism, one that deals with digital media as their own distinct forms of communication rather than merely adjuncts to print or broadcast.

4. Learn how to purposefully blend text, graphical content, multimedia and hypertextual, interactive elements. Explore how trends in personal publishing and social networking are forcing change in journalism and other information industries.

5. Use a variety of techniques to capture and monitor newly published or real-time information.

6. Develop a critical understanding of the theory and practice of online communication.

7. Attain a working knowledge of media law so that, when working as a professional communicator, they can assert legal rights and avoid needless infractions of the law.

8. Learn to incorporate and evaluate appropriate elements of multimedia and multi-platform storytelling, including information design, layout, organisation and visual communication theory and techniques.

**What you will be expected to achieve**

Students who successfully complete the Postgraduate Certificate in Digital Journalism will have demonstrated a developing competence in the areas below.

Students who successfully complete the Postgraduate Diploma in Digital Journalism, will have demonstrated a developed competence in the areas below.

**Knowledge and understanding**

<table>
<thead>
<tr>

How you will learn

We are committed to a diverse and stimulating range of learning and teaching methods that ensure the programme outcomes are addressed rigorously and effectively. Learning emphasises a close synthesis between theoretical understanding and practical application that helps students develop an advanced, critical approach to the subject of computing.

Media Law and Ethics is taught via lectures and seminars. Digital Sandbox, Critical Social Media Practices, Interactive Data Visualisation and Multimedia Journalism are newsroom- or lab-based sessions featuring practical hands-on teaching with some amount of explanatory lectures. There are also some workshops run by visiting speakers from industry across the programme.

The various modules of the programme provide a diverse range of topics. These will be further developed through students’ independent research and learning activities directed towards module assignments and the large-scale project component. Students are expected to engage in considerable independent reading and practical work for all modules culminating in the final project. This independent work will be supported by library resources, access to lab space and supervision from teaching staff.

How you will be assessed

Students are required to undertake and pass every element of the programme. The overall assessment is made up of the following components:

A multimedia portfolio consisting of online news stories and video reports for Multimedia Journalism; a series of small software projects for Digital Sandbox; an unseen exam, (or essay in 15-credit version) for Media Law and Ethics; practical coursework and blogging in Critical Social Media Practices; a series of practical tasks and an exam for Interactive Data Visualisation.

The assessment for individual modules is as follows:

Digital Sandbox will be assessed on three software projects during the Autumn and Spring terms.
Multimedia Journalism will be assessed through coursework (25% of the final mark) completed over three terms and a multimedia journalism portfolio consisting of digital news stories and video packages which is due in the Summer Term (75%).

Media Law and Ethics will be assessed through a three-hour unseen online exam in February, assessing aspects of media law for the 30-credit version or an academic essay for the 15-credit version of the module, which is due in January.

Critical Social Media Practices involves writing blog posts and practical coursework.

Interactive Data Visualisation involves a short report (20%) and a web-based interactive visualisation of data and a technical report (80%).

Major Practical Project: In the Summer Term, students complete a project consisting of a large-scale multimedia website and/or mobile application, presenting a sustained, in-depth piece of digital journalism work undertaken by the student. In association, students will also produce a 3-5,000 word critical analysis essay, reflecting on their work.

**Marking criteria**

<table>
<thead>
<tr>
<th>Mark</th>
<th>Descriptor</th>
<th>Specific Marking Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>80-100%</td>
<td>Distinction (Outstanding/ Exceptional)</td>
<td>Awarded when a candidate satisfies the requirements for a distinction, but to an outstanding degree. Such work may be of publishable quality, and will be a significant contribution to debate within the field.</td>
</tr>
</tbody>
</table>
| 70-79%      | Distinction                    | Work assigned a Distinction mark is likely to:
|             |                                | 1. address the topic in an explicit manner
|             |                                | 2. announce its structure at the start and stick closely to this announced structure
|             |                                | 3. have relationships between statements that are very easy to recognise
|             |                                | 4. have an excellent or original line of argument that can be followed very easily
|             |                                | 5. give wide-ranging and appropriate evidential support for claims that are made

Within this category of very good work, the mark awarded will be 70% or above. The mark awarded will depend on how successfully the work is judged to meet the above-mentioned criteria. At minimum, a piece of work at this level needs to answer the question or address the issue concerned, be well-constructed, and (perhaps most crucially) show evidence of
<table>
<thead>
<tr>
<th>Mark</th>
<th>Descriptor</th>
<th>Specific Marking Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>independent reading and thinking. This grade reflects the specific Learning Outcomes have been achieved to a high degree (including material that is relevant but not defined in the content of the unit); and, in addition, strong evidence that the content of the module has been appropriately embedded in the wider context.</td>
<td></td>
</tr>
<tr>
<td>60-69%</td>
<td>Merit</td>
<td>Work awarded a good pass mark is likely to: 1. correctly identify and discuss the general subject area of the topic/question 2. have a clearly detectable structure that is largely adhered to 3. have relationships between statements that are generally easy to follow 4. have a good quality line of argument 5. support claims by reference to relevant literature</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Within this category of good work, the mark awarded will be in the range 60-69%. The mark awarded will depend on how successfully the work is judged to meet the above-mentioned criteria. At minimum, a good pass piece of work must attempt to answer the question or address the issue concerned, be clearly written, and show signs that the student has read beyond the basic source material. For lecture-based assessments, this usually means going beyond what was presented in the lectures themselves; for essays that are not lecture-based, this means going beyond recommended ‘essential reading’. A top good pass will in addition be likely to have a clearer structure, a stronger line of argument, and draw on a broader range of material.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>This grade reflects the specific Learning Outcomes have been achieved; and, in addition, good evidence that the content of the module has been embedded in the wider context.</td>
</tr>
<tr>
<td>50-59%</td>
<td>Pass</td>
<td>Work awarded a borderline pass mark is likely to: 1. present relevant material but fail to use it to answer the question or address the issue 2. have a structure, but one that is rather loose and unannounced 3. have relationships between statements that are sometimes hard to follow 4. have a fair quality line of argument (information drives argument, rather than other way round)</td>
</tr>
<tr>
<td>Mark</td>
<td>Descriptor</td>
<td>Specific Marking Criteria</td>
</tr>
<tr>
<td>----------</td>
<td>------------</td>
<td>--------------------------</td>
</tr>
<tr>
<td>5. tend to make claims without sufficient supporting evidence</td>
<td>50-59%</td>
<td>This grade reflects the specific Learning Outcomes have been largely achieved.</td>
</tr>
<tr>
<td>30-49%</td>
<td>Fail</td>
<td>Failing work is likely to: 1. fail to adequately address the topic or to answer the question, either by reproducing material that is only partly relevant or by inaccurately reproducing material that is relevant 2. lack a clear structure or framework 3. have relationships between statements that are often difficult to recognise 4. have a poor quality line of argument 5. make poor use of evidence to support most of the claims that are made</td>
</tr>
</tbody>
</table>
| 10-29%   | Bad fail   | Represents a significant overall failure to achieve the appropriate learning outcomes (shall be deemed a valid attempt and not necessarily required to be re-sat). 20% might be awarded to an answer that contains something that shows that the student has attended the relevant lecture module, even
### Specific Marking Criteria

- **Mark 0%**
  - Non-submission or plagiarised
  - A categorical mark representing either the failure to submit an assessment or a mark assigned for a plagiarised assessment.

- **Mark 1-9%**
  - Very bad fail
  - A submission that does not even attempt to address the specified learning outcomes.

- **Mark if there is little in the answer that is of direct relevance to the question. A 10% answer contains no evidence that the student knows anything from the literature that is relevant to the question.**

### How the programme is structured

**Autumn and Spring Terms**

**Multimedia Journalism (30 CATS offered by Media, Communications and Cultural Studies)**
- consists of two components:
  1) **Online News Reporting** - Cognitive and mechanical skills required to produce fast and quality news reports that are ethical, clear, concise, complete, compelling and accurate. Reporting methods are introduced and students practice gathering information from online and traditional sources.
  2) **Online Video Journalism** - Introduces the types of equipment and technical considerations used in multimedia capture and production with a heavy focus on video and text storytelling in a range of formats. It focuses on mobile journalism (MoJo) using smart phones to film and edit.

**Digital Sandbox (30 CATS; Offered by Computing)** – This is the main practical module of the computing science components of the programme. Students undertake intensive six-hour lab sessions (2 x 3hrs) on each of 10 distinct contemporary means of coding and software configuration in journalism. Sample topics include data visualisation methods, understanding LAMP, CSS and design, Ruby and Python platforms, creative scripting, APIs, search engine and social media optimisation, veracity and validation, mobile application development, social identities and networks, authority and trust, taxonomy and community curation.

**Media Law and Ethics (30 CATS offered by Media, Communications and Cultural Studies)** – Series of lectures on history and contemporary developments of international media law and ethics. Specific topics include the legal problematising of journalism, defamation law and contempt issues, debates in media ethics, state security and secrecy, professional codes and practices, privacy, human rights and international law, and international comparisons.
Autumn Term

Interactive Data Visualisation (15 CATS offered by Computing) - A large amount of data is available in electronic resources, both offline and online. This module will give a broad introduction to techniques for gathering data from electronic sources, such as databases and the internet. It will cover both fundamental ideas and the use of some of the most important currently available tools. The module will also present tools and ideas for more effectively using the internet to communicate, visualise and generate news stories.

Spring Term

Critical Social Media Practices (15 CATS Offered by Computing) - This module immerses participants in the latest developments around social media reporting and campaigning. This is a participatory module which mixes up-to-the-minute case studies with a hands-on exploration of the tools and concepts. Students will become familiar with the affordances of digitally enabled crowdsourcing and participation as well as social media reporting, UGC verification, forensics and analysis.

Spring and Summer Terms

Major Practical Project (60 CATS; run by Media/Computing with supervisors from both departments). The students complete a Major Practical Project consisting of a large-scale digital journalism project which is presented on a website and/or mobile application. In association, students will also produce a 3-5,000-word critical analysis essay reflecting on the production process and effectiveness of their project. All students will be expected to engage in both Journalistic and Computing practices; the degree title will reflect the relative emphasis.

**Academic support**

Support for learning and wellbeing is provided in a number of ways by departments and College support services who work collaboratively to ensure students get the right help to reach their best potential both academically and personally.
All students are allocated a Personal Tutor (one in each department for joint programmes) who has overall responsibility for their individual progress and welfare. Personal Tutors meet with their student at least twice a year either face-to-face, as part of a group and/or electronically. The first meeting normally takes place within the first few weeks of the autumn term. Personal Tutors are also available to students throughout the year of study. These meetings aim to discuss progress on modules, discussion of the academic discipline and reports from previous years if available (for continuing students). This provides an opportunity for progress, attendance and assessment marks to be reviewed and an informed discussion to take place about how to strengthen individual learning and success.

All students are also allocated a Senior Tutor to enable them to speak to an experienced academic member of staff about any issues which are negatively impacting their academic study and which are beyond the normal scope of issues handled by Programme Convenors and Personal Tutors.

Students are provided with information about learning resources, the Library and information available on Learn.gold (VLE) so that they have access to department/programme handbooks, programme information and support related information and guidance.

Taught sessions and lectures provide overviews of themes, which students are encouraged to complement with intensive reading for presentation and discussion with peers at seminars. Assessments build on lectures and seminars so students are expected to attend all taught sessions to build knowledge and their own understanding of their chosen discipline.

All assessed work is accompanied by some form of feedback to ensure that students’ work is on the right track. It may come in a variety of forms ranging from written comments on a marked essay to oral and written feedback on developing projects and practice as they attend workshops.

Students may be referred to specialist student services by department staff or they may access support services independently. Information about support services is provided on the Goldsmiths website and for new students through new starter information and induction/Welcome Week. Any support recommendations that are made are agreed with the student and communicated to the department so that adjustments to learning and teaching are able to be implemented at a department level and students can be reassured that arrangements are in place. Opportunities are provided for students to review their support arrangements should their circumstances change. The Disability and Wellbeing Services maintain caseloads of students and provide on-going support.
The Careers Service provides central support for skills enhancement, running The Gold Award scheme and other co-curricular activities that are accredited via the Higher Education Achievement Report (HEAR).

The Academic Skills Centre works with academic departments offering bespoke academic literacy sessions. It also provides a programme of academic skills workshops and one-to-one provision for students throughout the year.

**Links with employers, placement opportunities and career prospects**

This programme helps students develop their critical and analytical abilities as well as a great number of practical sought-after skills and competencies. It therefore can lead to many types career including:

- Digital journalist
- Online editor at large news organisation
- Multimedia reporter
- Community/social media journalist or editor
- Project Manager for journalism projects
- Data Journalist
- Investigative journalist
- Interactive documentary producer
- Data mining specialist or Online Research Methods resource
- Entrepreneur/founder of media startup
- Web or Mobile designer
- Data visualisation specialist
- Video journalist
- Mobile Journalist
- Photojournalist

**The requirements of a Goldsmiths degree**

All taught postgraduate degrees have a minimum total value of 180 credits and involve one calendar year of full-time study. Some programmes may extend over more than one calendar year and, when this is the case, they have a higher total credit value. Programmes are composed of individual modules, each of which has its own credit value. Part-time students normally take modules to the value of 90 credits each year. If a programme has a part-time pathway, the structure will be set out in the section “How the programme is structured” above. Normally, all modules are at level 7 of the Framework for Higher Education Qualifications.
More detailed information about the structure and requirements of a Goldsmiths degree is provided in the Goldsmiths Qualifications and Credit Framework.

**Modules**

Modules are defined as:

- “Optional” – which can be chosen from a group of modules
- “Compulsory” – which must be taken as part of the degree

**Progression**

Some programmes may require students to pass specific modules prior to completion of the dissertation/major project (or equivalent). Additionally, where a programme of study extends beyond one calendar year, students may be required to pass specific modules in their first year of study before progressing to the second year. Where this is the case, these requirements will be set out in this Programme Specification.

**Award of the degree**

In order to graduate, students must successfully complete all modules specified for the programme, as set out within the section “How the programme is structured” above.

**Classification**

Final degree classification is calculated on the basis of a student’s mean average mark (based on credit value) across all modules on the programme.

Masters degrees are awarded with the following classifications:

- Distinction – 70%+
- Merit – 60-69%
- Pass – 50-59%

More detail on the calculation of the final classification is on our website.

**Interim exit awards**

Some programmes incorporate interim exit points of Postgraduate Certificate and/or Postgraduate Diploma, which may be awarded on the successful completion of modules to the minimum value of 60 credits or 120 credits respectively. The awards are made without classification.
When these awards are incorporated within the programme, the relevant learning outcomes and module requirements will be set out within the “What you will be expected to achieve” section above.

The above information is intended as a guide, with more detailed information available in the Goldsmiths Academic Manual.

**Programme-specific rules and facts**

**Interim Exit Awards**

**PGDip:** Students who successfully complete modules to the value of 120 credits may exit with the award of the Postgraduate Diploma in Digital Journalism

**PGCert:** Students who successfully complete modules to the value of 60 credits from the two core modules of the programme, or from one core module and one or more of the optional modules, may exit with the award of the Postgraduate Certificate in Digital Journalism

**Progression**

In order to progress to the Final Project and the MSc assessment students must fulfill the requirements for a pass at PGDip level (pass all 120 credits of taught modules).

**General programme costs**

In addition to your tuition fees, you will be responsible for meeting standard costs associated with your study. Find out more information at gold.ac.uk/programme-costs.

**Specific programme costs**

In addition to these standard costs, you will also be expected to meet some costs which are specifically related to your programme, which are set out below:

Some modules will require students to meet the costs of travel around London for field trips, research or reporting, and attendance at industry events.

**How teaching quality will be monitored**

Goldsmiths employs a number of methods to ensure and enhance the quality of learning and teaching on its programmes.
Programmes and modules are formally approved against national standards and are monitored throughout the year, such as in departmental committees, a variety of student feedback mechanisms and through the completion of module evaluation questionnaires. Every programme has at least one External Examiner who reviews comments annually on the standards of awards and student achievement. External Examiner(s) attend Boards of Examiners meetings and submit an annual written report.

Modules, programmes and/or departments are also subject to annual and periodic review internally, as well as periodic external scrutiny.

Quality assurance processes aim to ensure Goldsmiths’ academic provision remains current, that the procedures to maintain the standards of the awards are working effectively and the quality of the learning opportunities and information provided to students and applicants is appropriate.

Detailed information on all these procedures are published on the Quality Office web pages.
